### DOES YOUR CHILD HAVE A SORE THROAT?

Sometimes a sore throat is caused by *Streptococcus bacteria* (**strep throat**). A strep throat can lead to rheumatic fever if it is not treated quickly with antibiotics. Rheumatic fever is a serious illness because it can cause heart damage. Strep throat is different from a common sore throat and must be treated with antibiotics. We are seeing an increased incidence in strep throat in the community and at school.
